ABOUT

I am a detail oriented, creative designer with a passion for usability. I have a knack for creating innovative solutions that focus on aesthetics, while always keeping in mind the user experience. In my 7 years of working in both corporate and freelance environments, I have developed a keen eye for effective design, excellent communication skills and a highly organized work ethic. I thoroughly enjoy all facets of design, whether it be web, UI, logo/identity or print.

EXPERIENCE

Ongoing
Freelance Designer I take on freelance projects to gain experience in other areas of design where my day to day role would not go. I've gained a lot of experience communicating ideas, maintaining client relationships and working directly with clients from the brainstorming phase to delivery of finished piece.

June 2008 - Present
User Interface Designer
Hobsons
Oakland, CA Responsible for creating and maintaining every interface element and page layout within Hobsons' enterprise level software suite. Created wireframes, prototypes, performed usability testing, and delivered valid and accessible XHTML mock-ups to the development team. Developed new framework for, redesigned, and created new style guide for flagship CRM product. Brought existing code base up to valid XHTML 1.0 and WCAG 2.0 AA compliance. Managed additional interface designer. Worked with a team of developers to design a mobile application as well as a Facebook application.

July 2004 - June 2008
